Projects Experience

- | | |
|---|-----------------------------|
| YULCOM Technologies , Web Developer Intern | Montreal Apr 2026 – Present |
| <ul style="list-style-type: none">• Developed and updated a Python/Django API endpoint for a web platform, including filtering logic, query handling, data validation, and response testing.• Worked in a Docker-based development environment with PostgreSQL, Redis, Celery, and Git to support backend development, debugging, and code review preparation.• Maintained and updated WordPress client websites.• Used CMS editors, custom CSS, browser DevTools, and staging/production checks to troubleshoot layout issues and ensure stable website updates.• Supported bilingual English/French website updates by checking page consistency, layout behavior, and content presentation across language versions. | |
| Custom WordPress Website | Academic / Personal Project |
| <ul style="list-style-type: none">• Built a custom CMS-driven website using PHP, WordPress, Custom Post Types, and Advanced Custom Fields without page builders.• Developed reusable archive and single templates to render structured content dynamically and support scalable content management.• Implemented bilingual content architecture with Polylang for English and French content delivery. | |
| Greek Youth , Volunteer Website Support | Montreal Jan 2026 – Present |
| <ul style="list-style-type: none">• Maintained a live WordPress site through plugin updates, functionality checks, and issue troubleshooting.• Diagnosed and resolved a Google Maps display issue that affected location visibility and user access.• Supported small content and configuration updates while preserving site stability. | |
| Flower Shop – Full-Stack Django Web Application | Academic Team Project |
| <ul style="list-style-type: none">• Collaborated in a 3-person team to build a Django-based e-commerce application with frontend templates, backend logic, models, views, and forms.• Built category-based product browsing across dedicated pages to improve navigation and product discovery, rather than using a single filter form.• Implemented user authentication with Django's built-in <code>UserCreationForm</code> and <code>PasswordChangeForm</code> to support account registration and password management.• Restricted wishlist access to authenticated users and contributed to comment functionality and parts of the checkout/payment workflow in a full-stack team project. | |

Education

- | | |
|---|----------------------|
| Vanier College Website Design Specialist | 2025 – 2026 Montreal |
| Hunan City University B.A. in Teaching Chinese as a Foreign Language | 2013 – 2017 China |
